

PIE

Pie Intelligent Editor

Have you ever felt tired of...

Managing tons of email with heavy attachments?

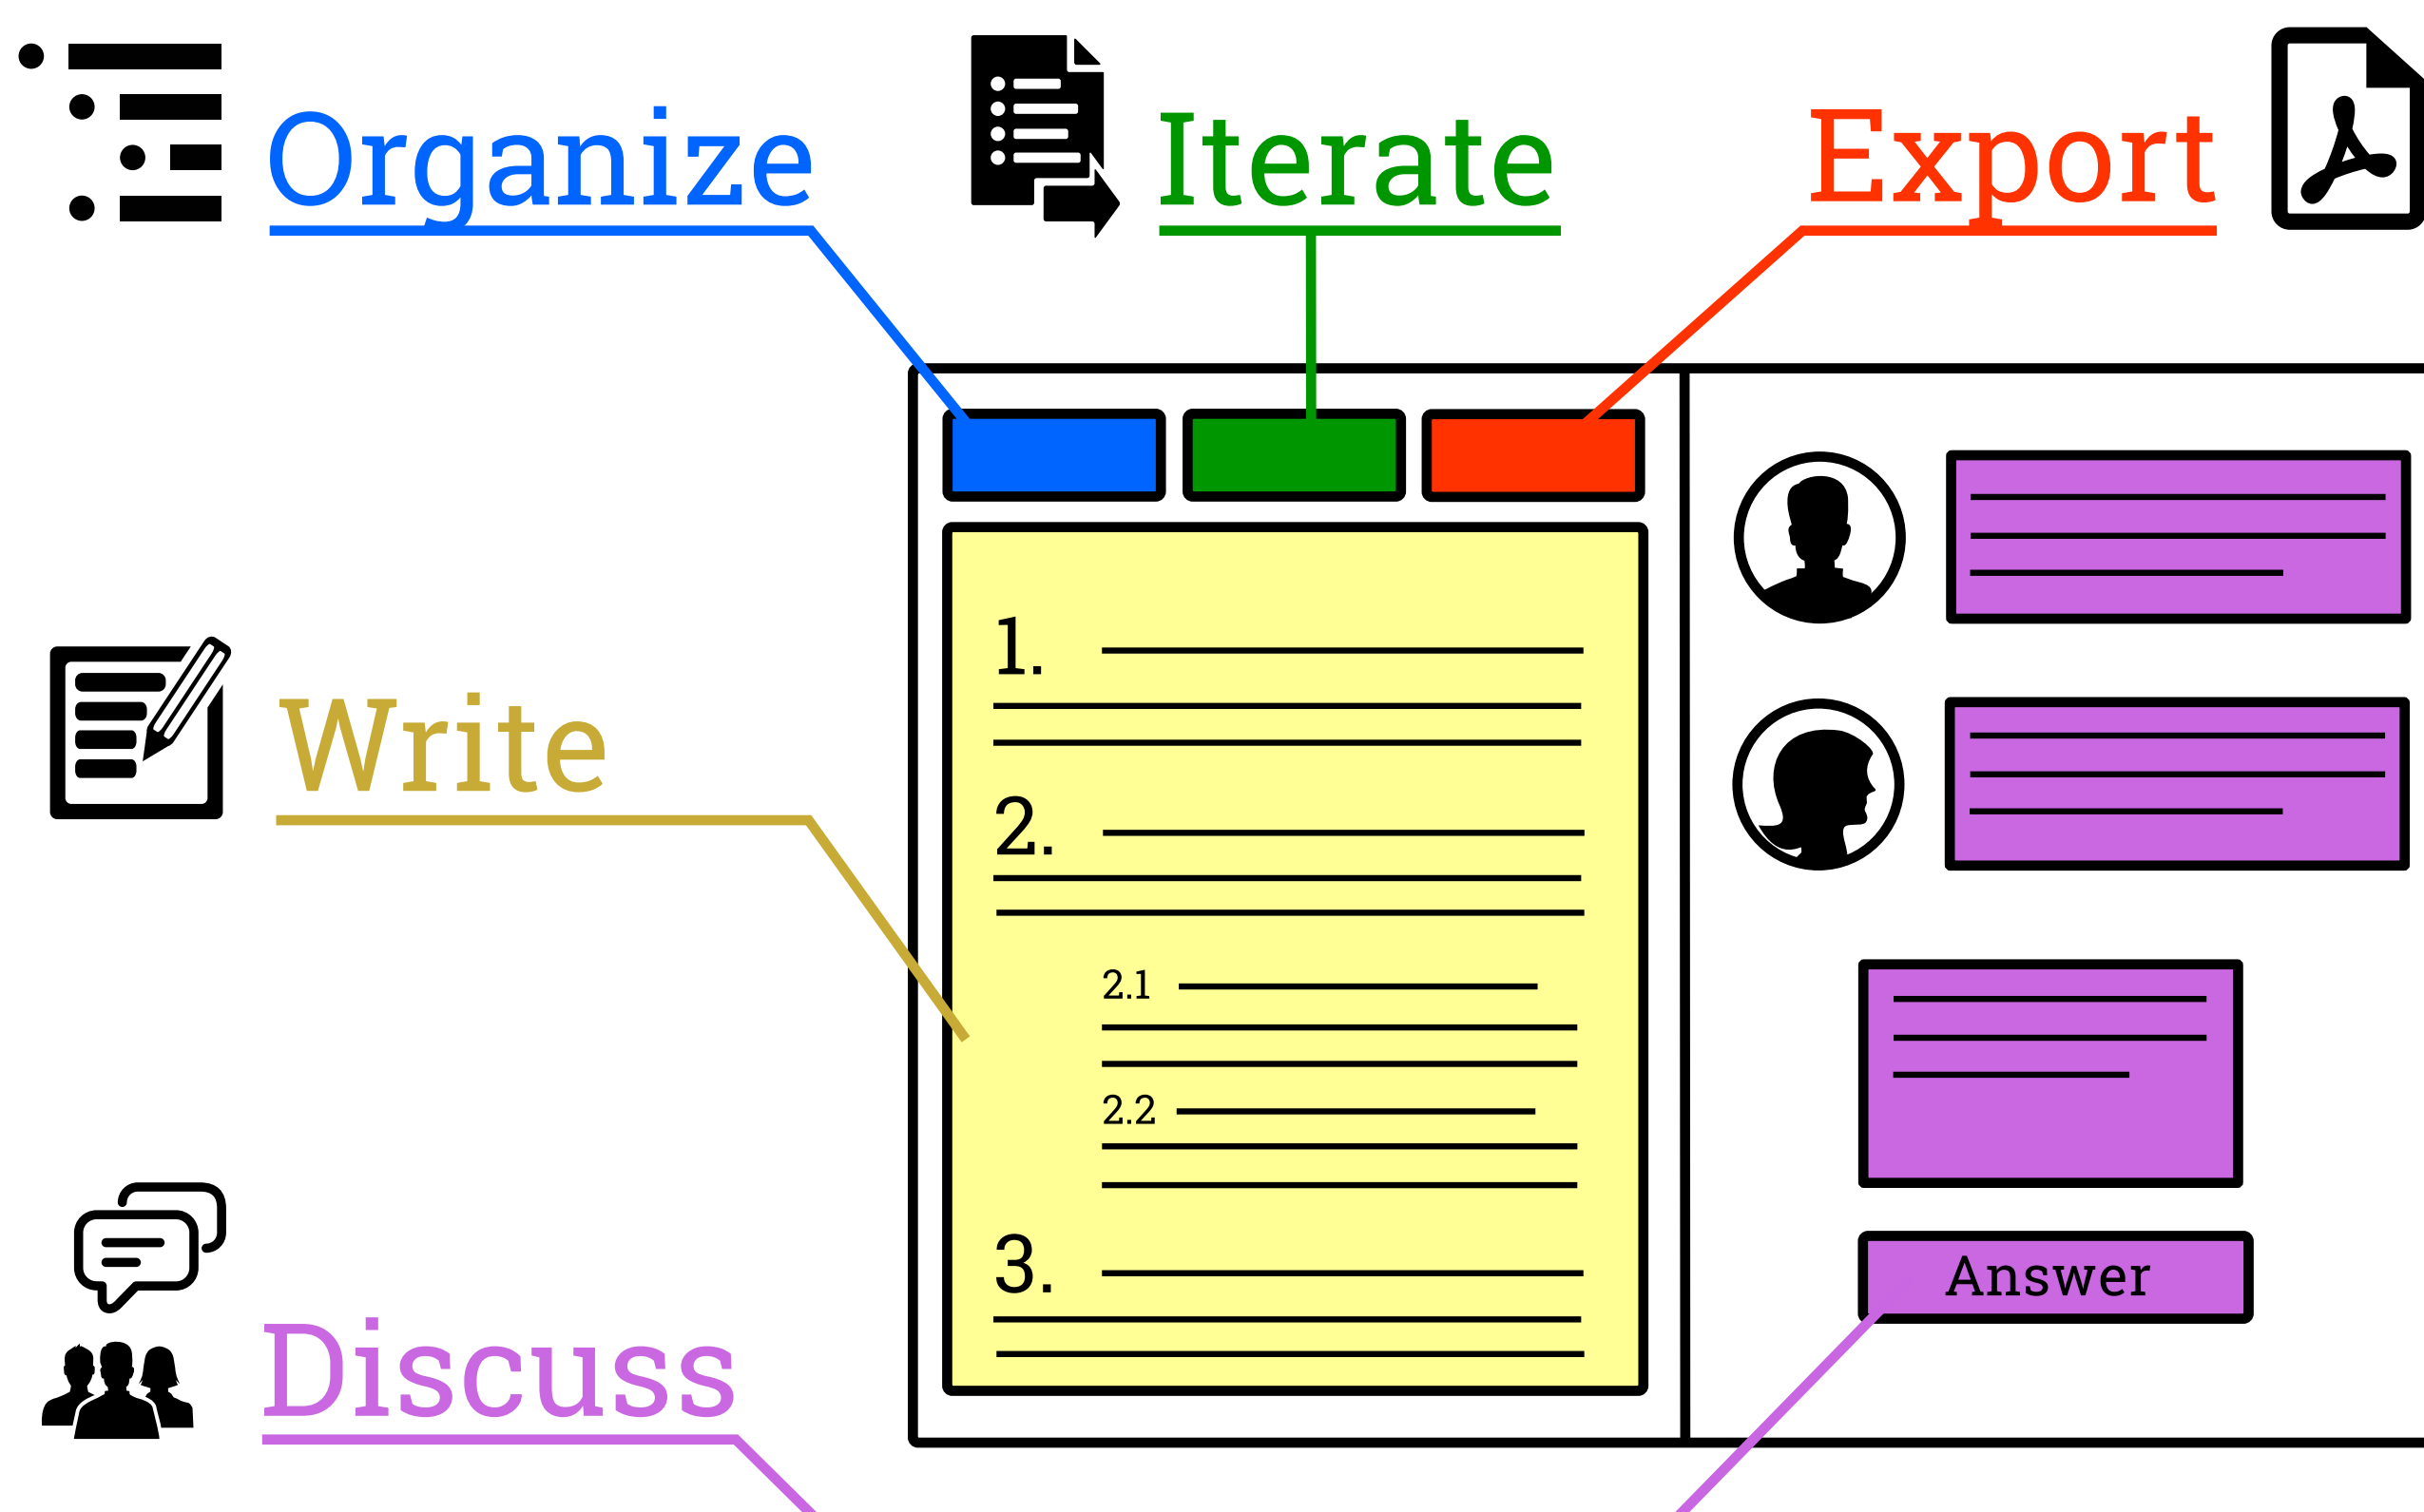

Merging each writer's version by hand?

Struggling with incompatible office suites?

Discover the power of our new collaborative writing workshop:

Integrate all your workflow in a web-based, platform-agnostic application. Put your documents in the cloud. PIE lets you import your mind maps, define your document architecture, write collaboratively, chat in real-time with all contributors, customize your styles and export in multiple file formats.

It is always up-to-date.
It requires no install.
It runs in the cloud.
It brings agility to document writing!

It will change the way you write.
